

GD - CLASSIFIED PERSONNEL

The School Board believes that classified employees are a very important part of the successful operation of the school programs. They, also, serve as one of the key influences that have an affect on present and future generations.

The community views them as an important member and respects them. Their behavior and actions in the community reflect not only upon them, but upon the entire group and school. They are hired by this system because the board firmly believes they are a credit to our school and our community.

They should strive to do the best job possible for the school and work continuously to improve and become more efficient. They should be competent, quiet in manner, gentle in contact with staff and students, fair, understanding, and firm. This attitude will win the respect of pupils and other staff.

Their duties and assignments will be set forth and administered by the Superintendent or his designee. The Board of Education will have final authority concerning matters and assignments of duties.

Adopted: Before 2009

Revised: July 13, 2009
