STAR Math
By Renaissance

STAR Math, a leading computer-adaptive assessment for grades 1-12, identifies which skills and sub-skills your students know, and which skills they're ready to work on next. Teachers can maximize instruction and practice with state-specific insights and resources to guide students on the optimal path to math proficiency.

Highmore-Harrold elementary teachers currently use STAR Math to measure student growth, while Title I uses STAR Math as a diagnostic for placement in the Title program. The Highmore-Harrold School District currently does not allow students to opt-out of student growth or diagnostic assessments.
